Data Scientist | AI Engineer
M.Sc. Artificial Intelligence

PROFESSIONAL SUMMARY

Data Scientist and AI Engineer with a Master's degree in Artificial Intelligence and a background in Mechatronics Engineering. Experienced in developing and deploying machine learning, deep learning, LLM, RAG, and computer vision solutions using Python, OpenCV, and Microsoft Azure. Skilled in building automation pipelines, transformer-based models, and cloud-integrated AI systems. Strong collaborator with experience in Scrum, Sprint planning, and Kaizen methodologies, comfortable working remotely, and committed to continuous learning and innovation.

SKILLS

Programming: Python | C++ | MATLAB
AI & ML: Machine Learning | Deep Learning | Computer Vision | LLM's | RAG | NLP
Data Bases: SQL | NoSQL
Cloud Platforms: Microsoft Azure | AWS
Backend Tools: REST APIs | Docker | Linux Terminal | PowerShell | Postman.
Automation & Control: PLC | Robotics
Other Tools: Amazon Lex | Copilot Studio | SolidWorks | Inventor | Proteus
Methodologies: Scrum | Sprint | Kaizen | Agile

LANGUAGES

Spanish | Native
English | Advanced

WORK HISTORY

Chief Information Officer

Aviextra | Oct 2025 – Current

- Built and prepared logistics transportation datasets for machine learning models.
- Performed data cleaning, preprocessing, and feature engineering using Python (Pandas, NumPy).
- Trained ML models for route optimization to improve transportation planning.
- Queried and integrated data from SQL databases into ML workflows.

Data Scientist

Beecker | Feb 2025 – Sep 2025

- Developed machine learning pipelines, including OCR, computer vision, and data preprocessing workflows (Python, OpenCV, NumPy).
- Built and deployed Azure-based automation solutions using Azure Functions, Azure Blob Storage, and Azure Cognitive Services.
- Implemented RAG systems integrating LLMs, vector embeddings, and Azure Cognitive Search to improve accuracy in document comprehension.
- Collaborated with cross-functional teams to deliver scalable, cloud-native AI solutions aligned with business requirements.

Service Desk Analyst

Tata Consultancy Services | Oct 2024 – Feb 2025

- Provided technical support, troubleshooting network, software, and hardware issues for remote enterprise users.
- Managed Active Directory, identity access, and user account administration.
- Ensured operational continuity through incident management, ticketing systems, and root cause analysis.

EDUCATION

- Data Science Bootcamp | TripleTen, 2026
- M. Sc. in Artificial Intelligence | UAQ, 2024
- B. Eng. Mechatronics Engineer | Universidad TecMilenio, 2019

PROJECTS

- 3D Object Reconstruction Using Deep Learning Algorithms (2022–2024)
- Transformer Model for Language Translation (2024)
- Star Type Classification Model (2024)
- Titanic Survival Probability Prediction (2023)
- SAE Aero Design Competition – Wing Design (2019)
